

# Protective Non-Slip Floor Sheet "Safe Step Shield"

## Example Scenes :

### ◇ Bathroom

As an alternative of bath mat.

### ◇ Aside of bed

To prevent stumbling when standing up.

### ◇ Toilet

As an alternative of urinal mat.

### ◇ Examination table

To absorb liquid and prevent infection.

The thin protective paper sheet reduces the patient's risk of stumbling when stepping on it. The sheet is approximately 1/10 the thickness of a regular bathmat.

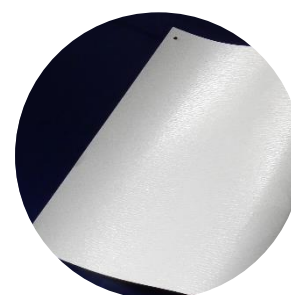

Reduce the risk of infection with a hygienic disposable sheet, which is easy to dispose of after use.

The bumpy surface created by paper craping technique reduces the likelihood of the sheet sticking to the foot and enhances its non-slip function.

Reduce the risk of slipping with a non-slip laminated film. The lamination also prevents the floor from getting wet.

It quickly absorbs blood, urine and other liquids. This protective sheet can absorb up to 2.6g of liquid per gram of the sheet's weight. Approximately, up to 70g per sheet.

# Protective Non-Slip Floor Sheet “Safe Step Shield”

Sheet Size 530 x 390mm  
50 sheets / package x 10 in outer carton

**Material:** fresh pulp, non-slip lamination

**Weight:** Approx. 13.4kg / outer carton

**Outer carton:** 580 x 410 x 195mm

**TOYO product code:** 251860

**JAN code:** 4904860251861
